

» WEH® GAS CONNECTORS

Just FLIP to fill gaseous media

A large, detailed photograph of a gas connector assembly. It features a central silver-colored metal body with two brass-colored valve handles on top. A horizontal stainless steel tube passes through the center. An orange dot on the side of the main body has a line pointing to the text "Instant connection to gas cylinder valves".

Instant connection
to gas cylinder valves

Compressed Gas Filling - Safe & Efficient

WEH® Quick connectors for filling gases and gas mixtures, e.g. inert gases, oxygen, nitrogen, propane, acetylene, CO₂, medical gases etc. meet with the stringent requirements in terms of safety and leak tightness for industrial gas handling applications while providing substantial benefits:

- Direct connection to standard cylinder valve threads
- Safe & pressure-tight connections in seconds
- No hand tightening, tapes or thread sealants
- Safety peg prevents accidental disconnection under pressure
- Improved productivity & substantial cost savings

WEH® Gas connectors are available for a large number of valve configurations - female or male threads, Pin Index systems, with or without residual pressure valve. They correspond to nearly all national cylinder standards (CGA, DIN, BS, NF, CEN) and are field tested worldwide with more than 70,000 connectors sold.
